For Immediate Release

ANGEL INVESTORS MAINTAIN DIVERSE PORTFOLIOS, WITH MEDIAN CHECK SIZE OF $25,000, ACCORDING TO EARLY RESULTS OF “THE AMERICAN ANGEL” CAMPAIGN

Kansas City, MO, June 29, 2016 – Angel investors – accredited individuals who collectively support the American startup industry with some $24 billion of capital per year – maintain diversified portfolios that represent roughly 5 percent of total held assets, with median investments of $25,000 per deal. Today, the Angel Capital Association (ACA) and Wharton Entrepreneurship at the University of Pennsylvania released these and other early insights from the ongoing “The American Angel” survey, which is designed to provide the deepest research to date into the characteristics of angel investors. The survey is open for more angels to participate.

Additional preliminary research findings to date:

- Angels invest in nearly 16 companies over their portfolio lifetime.
- Angels typically make additional (follow-on) investments in companies, with a median of three follow-on deals over time.
- Angels financed a median of two companies each in 2015.
- The longer angels invest, the more checks they write and the larger their portfolios. Angels who started investing in the 1970s and 1980s have written on average 45.6 checks, compared to 4.4 checks written by individuals who started angel investing in 2014 or later.
- Angel investors remain positive on the early-stage market: 27 percent indicate they will increase angel investments this year, 53 percent expect to maintain their level of investment, and only 20 percent expect to decrease.
- While the majority of angel investors are men more than 20 percent of respondents to date are women.

The confidential survey is open and seeking participants. It is funded by Rev1 Ventures’ John Huston Fund for Angel Professionalism and is administered by Wharton Entrepreneurship, one of the world’s most influential centers of entrepreneurship. The survey closes in fall 2016.

The American Angel Campaign is the first comprehensive study of U.S. angel investor demographics, including their path to investment, mindset and approach – and seeks to demystify this generally private type of investing. Most angel’s funding startups are exempt from securities registration, and detailed information on investors is often not publicly available. To date, the campaign has garnered about 1,000 participants.

“The information that is emerging gives an exciting preliminary picture of how angel investors operate and support a diversified portfolio of companies,” said Marianne Hudson, executive director of ACA. “We hope to attract many more participants, so that we can further solidify facts about angels and how critical they are to the job-creating universe of early-stage companies.”
ACA believes these insights will be essential to strengthening and growing the startup ecosystem, and will assist the association in its efforts to address issues impacting startups and investors with regulators, legislators and economic development entities. All active, accredited angels are encouraged to take this short, confidential survey which will also help dispel or confirm many long-held assumptions about angel investing.

Laura Huang, assistant professor of management at the Wharton School, University of Pennsylvania, is leading the research effort and administration of the survey. “What we are seeing is real data never before available at such depth that identifies angels as skilled, tenacious and diversified investors who bring significant professional experience and business expertise to their investment approach,” said Huang. “We hope to obtain thousands of additional respondents over the next few months to ensure this data continues to provide illumination into the mindset of this investor.”

Angels who take the survey will gain early access to the complete results and report and also be eligible for drawings. For more information and to take the survey, visit TheAmericanAngel.org.

About the Angel Capital Association (ACA)
As the voice of the angel investors, ACA offers professional development, public policy advocacy and significant benefits and resources to its membership of more than 13,000 accredited investors, who invest individually or through its 240 angel groups accredited platforms and family office members. Since its founding in 2005, ACA has built the world’s largest collective of angels across North America, and aligns like-minded angels to build their early-stage investment skills and share innovative ideas and practices. More information is available at: ACA events and Forbes and Inc. columns, and at www.angelcapitalassociation.org @ACAAngelCapital; #TheAmericanAngel.

About the Wharton School and Wharton Entrepreneurship
Founded in 1881 as the first collegiate business school, the Wharton School of the University of Pennsylvania is recognized globally for intellectual leadership and ongoing innovation across every major discipline of business education. With a broad global community and one of the most published business school faculties, Wharton creates economic and social value around the world. The School has 5,000 undergraduate, MBA, executive MBA, and doctoral students; more than 9,000 participants in executive education programs annually and a powerful alumni network of 94,000 graduates.

Wharton Entrepreneurship is widely considered one the most influential Centers of entrepreneurship in the world. The Wharton School was the first to develop a fully integrated curriculum of entrepreneurial studies in 1973. Today the Goergen Entrepreneurial Management Program, named in honor of Wharton alumnus and benefactor, Robert Goergen WG’62, is one of the largest entrepreneurial teaching programs available, offering more than 20 courses to some 2,000 students and entrepreneurs. The faculty of over 20 professors and practitioners teach courses for undergraduate and graduate students and guide initiatives for entrepreneurs. http://entrepreneurship.wharton.upenn.edu/.

About Rev1 Ventures and the John Huston Fund for Angel Professionalism
The John Huston Fund for Angel Professionalism was created in recognition of John Huston, founder and former leader of Ohio TechAngel Funds (OTAF) in Columbus, Ohio. This fund supports research and educational activities to promote angel investing best practices in partnership with the Angel Capital Association (ACA). John and OTAF were founding members of ACA. Rev1 Ventures is a seed-stage
venture development organization that combines investment capital and strategic services to help entrepreneurs build products people want and companies that succeed. www.rev1ventures.com.
